The Senate bill regulating the pay and increasing the efficiency of the army was taken up.

Mr. Farlaxen explained the provision of the bill, saying it was prepared by the War Department, sided by the best intellects and most eminent military experience of the country, unanimously approved by the Senate Committee on Military Affairs, at the head of which is the test and most eminent military experience of the country, unanimously approved by the House Military Committee, headed by Col. Bissell, likewise a stateman and soldior. He said the committee had stricken from the bill the section providing for the appointment of sixty-two additional cadets, their object being to constitute the army a kind of West Point academy, so that a young man of courage and enterprise, who has no political patronage to send him to that institution, may, nevertheless, by his own good sword, seek his fortune in the rank and file, and by merit attain to the highest post and distinction. So far as he was informed, of five hundred and ninety-two officers, but nineteen have come from the ranks of the army, and these were under special provisions passed during the war of 1812, and the Mexican war. He further explained that the bill increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased the pay of privates from \$7 to \$10 a month, and increased t become worse, and recruiting offices might as well be

And the Standard of the 8th the following:—
During the past week 16,028 bushels of anth have been exported from this colony. Small quantities of new salt have been gathered from day to day, in order to supply the demand; the salt pans both at this, Salt Cay, and Cockburn Harbor, are in excellent condition, and should the weather continue fine there is every probability that the ten vessels now in port will be despatched during the next week with full cargoes. Price twenty sive cents. Export duty half a cent.

Kings County Court of General Essences.—Thomas Conner, a lad about 19 years of age, was placed on trial yesterday in this court, (Judge Moore presiding,) on an indictment for highway robbery. Charles McGione, indicted with the defendant, James Ryan, and Jas. O'Noil, were tried and convicted last week. John Nelson was the complaining witness.—He is a baker by trade, a resident of Brooklyn, and follows his occupation in New York. On Saturday evening, the 30th of April last, he received his weekly wages, (six dollars,) and started for home; on his way he stopped in Duane street to see a friend, and got a bottle of wingkey, which he carried in his coat pocket. He stopped in various other places, and then returned to Brooklyn, lit being after one o'clock; when in Court street, near Bergen, he met eight or nine persons, among whom were defendants. They accosted him, and wanted to know what business he had to be out so early in the morning, shd then, laying hold of him, took away his bottle. They then permitted him to go a few paces and again attacked him, and while several held him fast, one of the number took the money out of his pocket. Several officers of the Third district police, coming up, took the defendants for matody. These facts being proved, the case was given to the jury, and a verdict of simple assault was randered. The two other defendants pleaded guilty to assault and battery, which was accepted, and they were sentenced to imprisonment in the perisoner will, therefore, remain in jull until the proper representations can be made to the Governor of the State.

We have received a copy of a neat newspaper, in size about 18x24, well printed, and published at Scottaburg, Oregon Territory, on the 16th June. Wm. J. Baggs is the publisher, and D. J. Lyons is the editor. It is called the Umpqus Weekly Gazette, and the number before us is the eighth of the

It is worse than folly to expect anything from the Pa-cite Mail Company, who are the favorito nephaws of Un-cie Sam. He has sent them an ear, and closed his eye-on his poor relations in the Umpqua Valley.

three deaths from cholera on the 21st and 22d insts. We learn that a number of cases of cholera have occurred at Eaton. Six deaths have occurred since last Saturday, and there are a number of other cases. Among the deaths, was that of the Teller of the Branch Bank after five hours illness. The utmost consternation prevails, and a number of families have left the place. The disease has also made its appearance at Camden. There were twenty seven deaths from choiera at Buffalo for the week ending the 22d inst. A little boy, whose name we did not learn, but whose family reside upon Georgis street, went in swimming Sunday afternoon, was taken with cramps, and died of cholera yesterday morning. His father was taken yesterday morning early, and also died; the mother was seized soon after, and at noon was past hope. In the same neighborhood were six others, we understood last evening, all of whom had died within twenty-four houra.—Buffalo Democracy, July 25.

Two cases of cholera occurred in this village yes-terday, both proving fatal. We are informed that they were foreigners who came over from the Falls yes-terday to avoid that disease which now prevails there. We hear of reports in the country, that cholers is of frequent occurrence in this village; but all such reports are untrue. There has been but three cases in town this season, and in each instance the individuals brought the disease with them from other places. Our village was never more healthy than at the present time. The cause of such universal good health is mainly attributed to the excellent arrangements perfected and carried out by the Board of Health.—Lockport Courier, July 24.

Since our last publication—a period of two days—we hear of four deaths by cholera. Two of these are children belonging to the German family removed from North Clinton street to the hospital, in a half-famished and filthy condition; a stranger named Mead, from Yates, Orleans county—an intemperate man, who came here to take charge of another cholers patient, also intemperate; a man

named Allen, on Joiner street, also intemperate.—
Rochester Union, July 24.

GREAT MORTALITY.—In a single family in Franklin street, the following persons have died within
about the space of a fortnight:—Thomas Phillips
and wife, and two sons and two daughters; the
mother-in-law and a sister-in-law of Mr. Phillips;
also the wife of Mr. Conner and two children—
making eleven in all. Their disease is said to have
been the cholera, or something akin to it. Beside
these we do not learn of more than four who have
died of reported cholera the present season. With
these exceptions the general health of the city may
be considered good for the season of the year. The
locality in Franklin street has a reputation for
being fatal in other complaints than those which
caused the death of the eleven persons referred to.

There were seven deaths reported as choiera, on Congress street continued, between Saturday evening and this morning. Five of the cases occurred within a few rods of Smith's pump. On yesterday afternoon, three hearses stood in that neighborhood at the same moment, cach receiving a victim. We believe that five of the seven mentioned were Irish. It is understood that ten of the "mourning party" at the "wake," near the pound (before referred to), have died of choiers.—Troy Budget, July 24.

We understand from good medical anthority that, notwithstanding reports to the contrary in the newspapers, samething like a dozen cases of Asiatic choiera have occurred in this city within four weeks past—we mean cases which our best physicians have pronounced to be of choiera. No alarm is entertained, however, that the diséase will rage to any serious extent here. It is well, nevertheless, that the public should know the truth—Lovell Courier, July 24.
